Defines the cabinet refilling process. This allows the viewing of queued cabinet refill requests and the ability to selectively send these requests on a station or individual request level to the carousel.

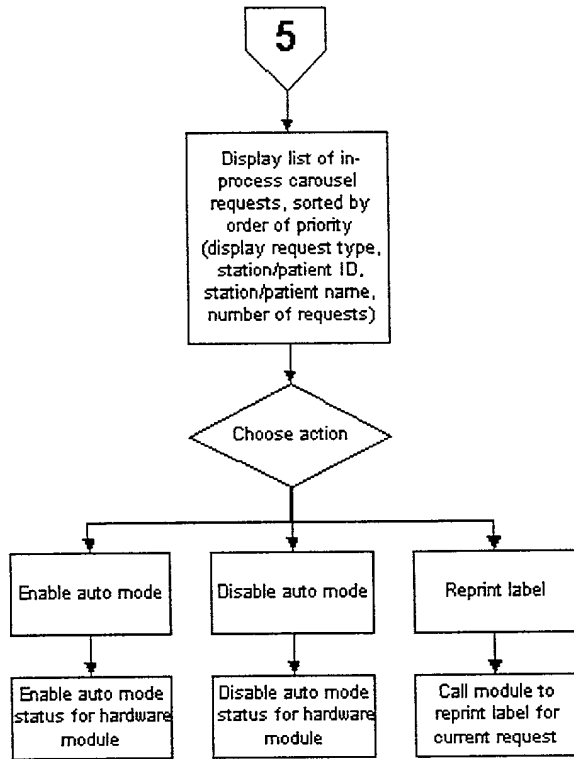

Defines the patient first dose filling process. This allows the viewing of queued first doses and the ability to selectively send these requests on a patient or individual request level to the carousel.

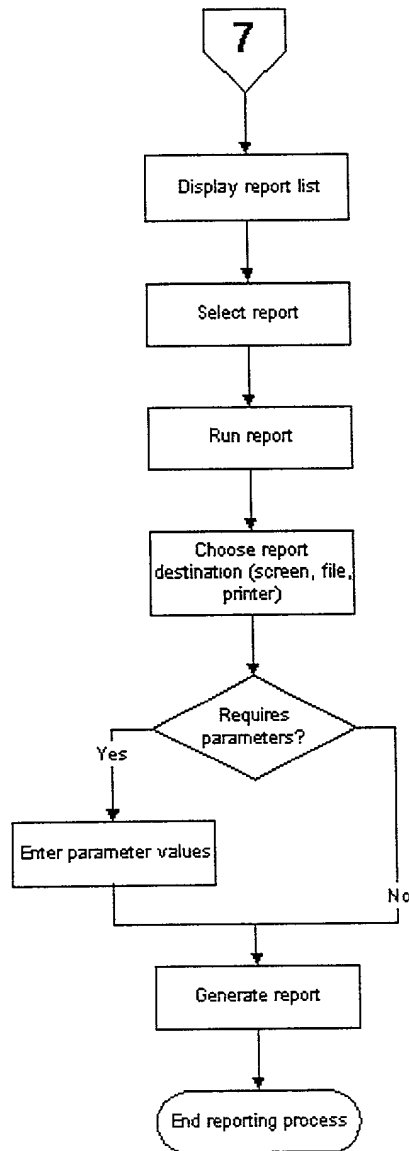

Defines the patient cart filling process. This allows the viewing of queued cart fill dispenses and the ability to selectively send these requests on a delivery unit or patient level to the carousel.

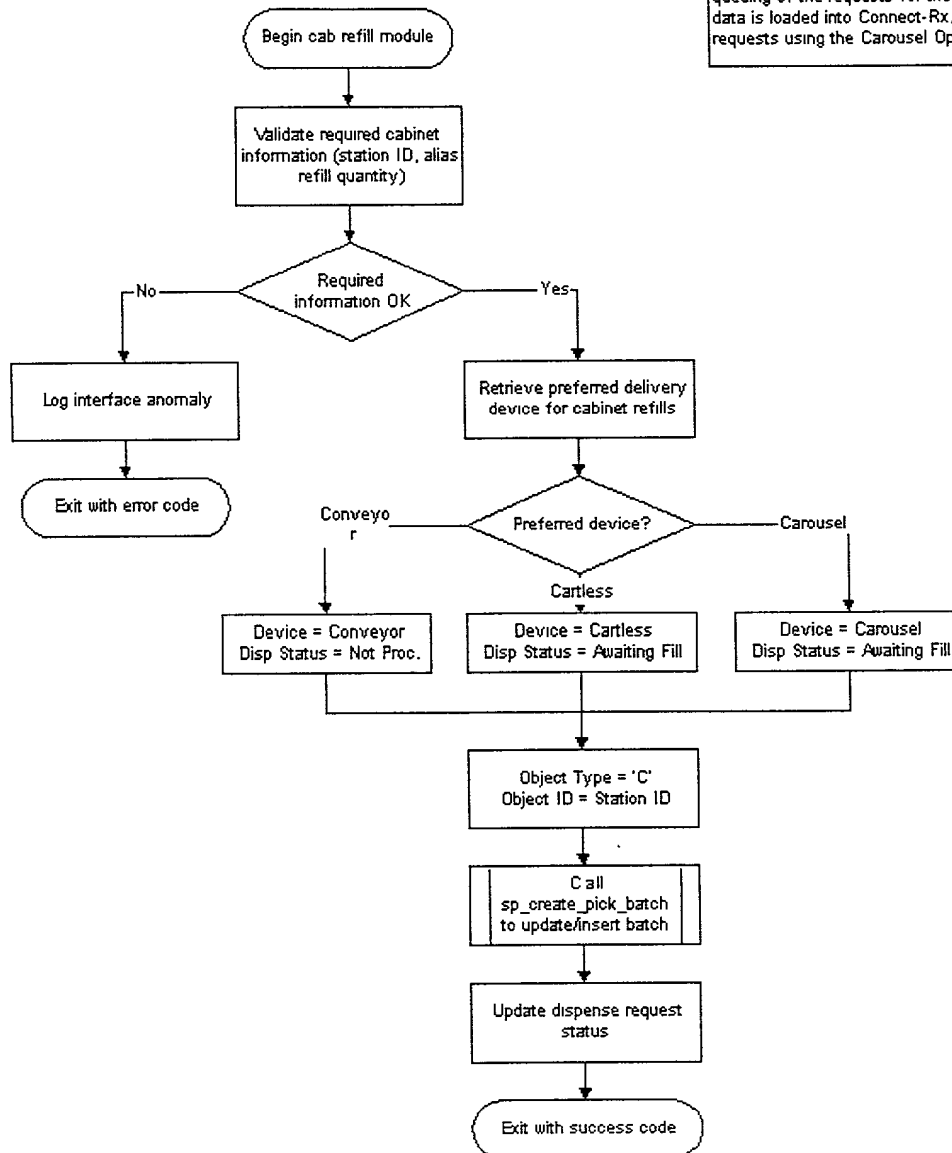

Defines the processing flow of the carousel queue screen. This screen displays the requests that have been sent to the carousel, including the request currently being processed and the requests that are waiting behind the current request. In auto-mode, the carousel will automatically move to the next request.

FOUO " 8879550

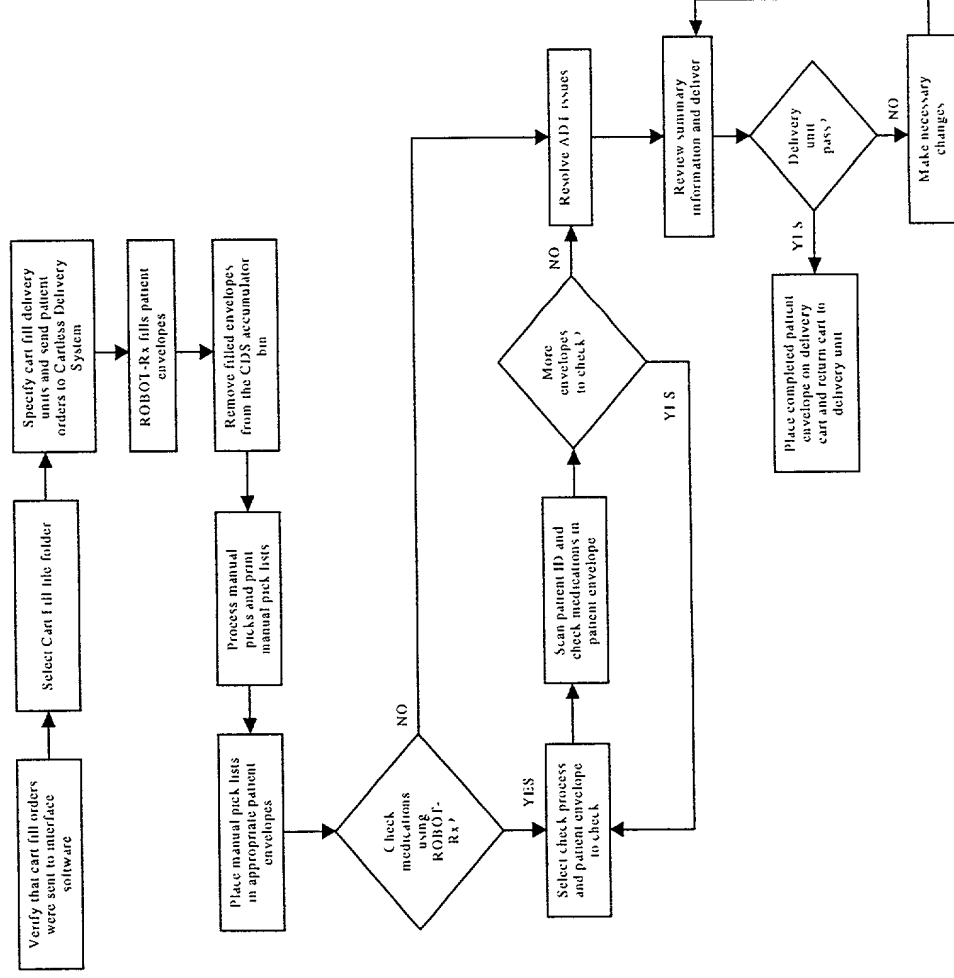

Defines the reporting process from the Carousel Operations Application. Users are allowed to run any configured report and choose to generate the report to the screen, to a file, or to a printer.

Defines the third-party cabinet refill interface. This involves receiving cabinet refill information and the queuing of the requests for the carousel. Once this data is loaded into Connect-Rx, the user would fill the requests using the Carousel Operations Application.

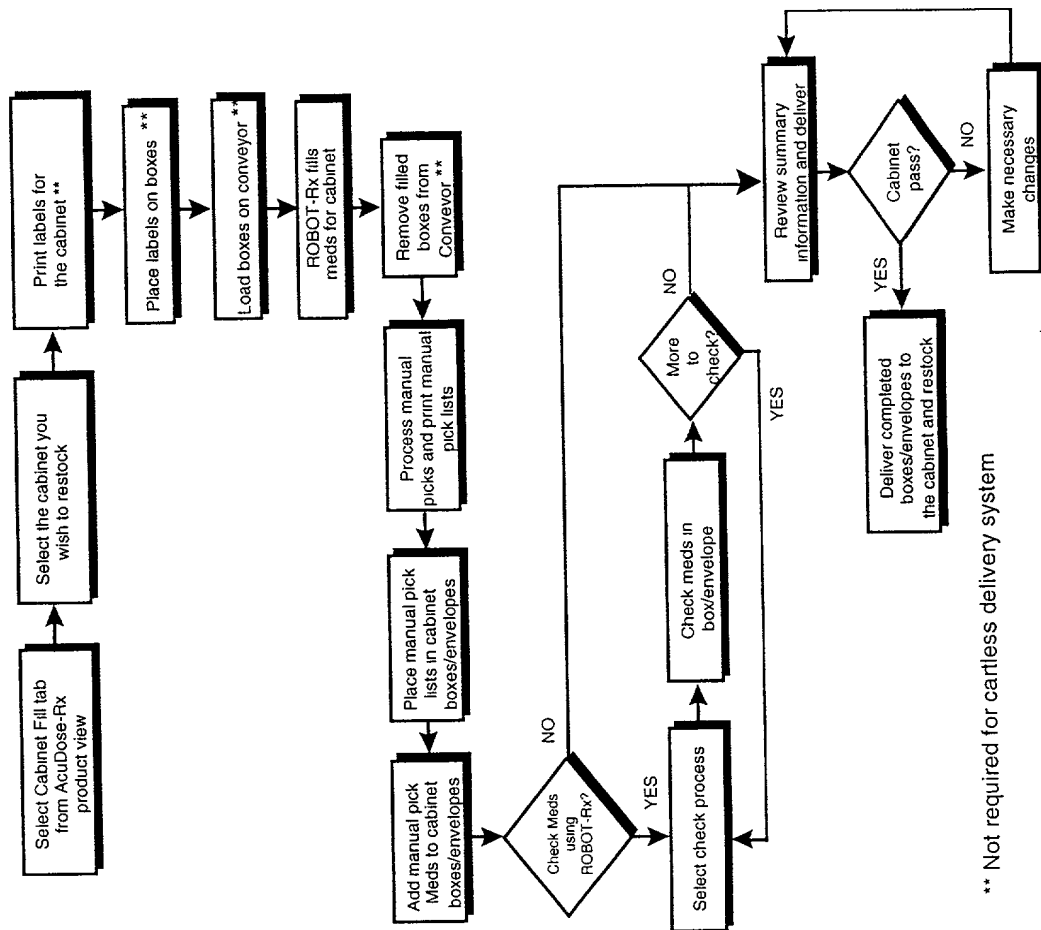

Robot Patient Fill Process

Cart Fill Process with Cartless Delivery System

Robot Cabinet Fill Process

Cabinet Restocking Process

** Not required for cartless delivery system
